RICHA KIRAN

Noida, Uttar Pradesh, India | +91-9868632287 | richa21kiran@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Software Developer with 2 years of professional experience building enterprise web applications using C#/.NET and React/TypeScript, with a strong object-oriented programming foundation in Java. Experienced across the full application lifecycle — API development, database integration, testing, and cross-team delivery — within Agile teams using Git and Azure DevOps. Comfortable working with cloud platforms (AWS EC2, Microsoft Azure) and skilled in advanced, deliberate use of Claude (Opus 5) for agentic coding, including persistent project context and context-window management. Open to relocation globally (will require visa sponsorship for roles outside India); fluent in English (business level).

TECHNICAL SKILLS

Languages (Programming): Java, C#/.NET, JavaScript, TypeScript, Python, C, HTML, CSS

Frameworks & Libraries: React JS (18+), Node.js, .NET, Redux

Databases & Cloud: SQL, AWS EC2, Firebase, Microsoft Azure (AZ-900 & SC-900 certified), Azure App Services, Azure Monitor / Application Insights, Kudu

AI-Assisted Development: Advanced use of Claude (Opus 5, 1M-token context) for agentic coding — persistent project context via CLAUDE.md, proactive context-window management (/compact, /clear) to sustain output quality across long sessions, and model switching by task complexity; outputs always validated before use

Testing & QA: Jest, Unit Testing, Integration Testing

DevOps & Tools: Git/GitHub, Azure DevOps, Jira, Postman, IntelliJ IDEA, VS Code

Practices: Object-Oriented Programming, Software Design Patterns, Software Configuration Management (Git), Agile/Scrum, Code Reviews, Debugging & Troubleshooting, CI/CD exposure

WORK EXPERIENCE

Software Developer | *BP (formerly British Petroleum), Pune, India* Jul 2024 – Present

- Design and development of full-stack features (frontend: React/TypeScript; backend: C#/.NET) for BP's Production & Operations tools.
- Design and implementation of REST APIs, integrating with a central database.
- Cross-team collaboration on a Semarchy data-integration initiative spanning multiple business units.
- Analysis and translation of business requirements into technical specifications for new features.
- Application of software design patterns to build reusable, maintainable components.
- Debugging and troubleshooting issues across frontend and backend during feature development and maintenance.
- Debugging application failures, exceptions, and errors using Azure Monitoring tools such as Application Insights.
- Hands-on experience with Azure App Services and deployments, including using Kudu for diagnostics and troubleshooting.
- Use of Git and Azure DevOps for software configuration management, version control, and CI/CD workflows.
- Peer code reviews and Agile/Scrum development practices.
- Use Claude as part of daily development workflow — persisting project conventions in CLAUDE.md, proactively managing context-window usage to avoid quality degradation on long sessions, and switching models based on task complexity — validating all outputs before use.

Software Development Intern | *ImpactQA, Noida, Uttar Pradesh* May 2024 – Jun 2024

- Built the front end of Project Falcon, a software testing tool for technical and non-technical users, using React.js.
- Integrated the frontend with backend REST APIs and used Postman for API testing and validation.

RELEVANT PROJECTS

Tally – Liveability Dashboard | *Personal Project* Aug 2025 – Sep 2025

- Built a full-stack web app (React, TypeScript, Node.js, Firebase Firestore) that aggregates resident survey data and visualizes it through interactive charts to help users compare localities on amenities and living standards.

Verb – Tech Blogging Platform | *Personal Project* Sep 2025 – Present

- A MERN-stack blogging platform for jotting down tech-related thoughts, using Redux for state management and MUI components, with Google Sign-In and full blog creation/viewing functionality on a Node.js/Express backend. GitHub

Castrol Workshop Management System | *BP — Academic Project, Team of 6* Jan 2024 – Jun 2024

- Built a certification-management app (React, TypeScript, Node, Firebase) including auth, OTP verification, and a status dashboard, using Agile practices with Jira and Git, plus unit, integration, and end-to-end testing.

EDUCATION

B.Tech, Computer Science and Engineering | *Vellore Institute of Technology, Vellore, India* Sep 2020 – Aug 2024

- CGPA: 9.07
- Core curriculum: data structures & algorithms, object-oriented programming, database management systems, operating systems, computer networks, and software engineering, with applied web-development and full-stack project work.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) – July 2023
- Microsoft Security, Compliance, and Identity (SC-900) – June 2023

LANGUAGES

- English – Business/Professional Working Proficiency
- Hindi – Fluent (Native)

ADDITIONAL

- Active open-source contributor via Hacktoberfest since 2022, collaborating with the global developer community.
- Lead App Developer, Innovator's Quest (VIT technical club) – built the club's iOS event/member-engagement app.
